Atypical Canine Infectious Respiratory Disease - Reporting Form

Instructions: Use this form to report suspected case of Atypical Canine Infectious Respiratory Disease (aCIRD) in Los Angeles County. Currently aCIRD cases are considered those that had PCR negative respiratory panel test results, those that developed rapid and severe infectious respiratory disease and died from an unknown cause, or those that have had unusually prolonged/chronic upper or lower respiratory signs from an unknown cause and that were poorly responsive to antibiotics.

Date form completed: _____ Submit completed form to: vet@ph.lacounty.gov OR fax to (213) 481-2375.

1. Dog			
Name:	Breed:	Sex/ Neut:	Age:

☐ Chest radiographs, findings:

☐ Respiratory PCR panel ☐ Respiratory cultures ☐ Other:

7. Treatment Summary

☐ Hospitalized ☐ Supplemental oxygen ☐ Antibiotics (type):
Response to treatment:

Comments:

8. Client Education

Given the lack of information about the cause of aCIRD, sick dogs should be isolated at home for 28 days from the first day of illness and exposed/asymptomatic dogs should be quarantined for 14 days to monitor for illness, as a precaution.

Owner directed to:

1. Keep dog isolated at home for 28 days from the first day of illness: ☐ Yes ☐ No
2. Keep asymptomatic/exposed dog at home for 14 days from the date of the last exposure: ☐ Yes ☐ No

PLEASE SUBMIT LABORATORY RESULTS WITH THIS FORM AND EMAIL TO: vet@ph.lacounty.gov
