Description: SUD systems are serving about 5% of people who need treatment services as the other 95% of people who need SUD treatment either don't think they need it or don't want it. The R95 Initiative is designed to:

- Ensure that DPH-SAPC creates a specialty SUD system that is focused not just on the ~5% of people with SUDs who are already receiving and open to treatment services, but also the ~95% of people with SUDs who do not receive treatment services for any reason; and
- Communicate through words, policies, and actions that people with SUD are worthy of our time and attention, no matter where they are in their recovery journey, including if they have not even started process yet.

Capacity Building Category: Fiscal and Operational Efficiency

Description: Effective July 1, 2023, DPH-SAPC and treatment providers will experience another significant shift in how DMC services are reimbursed with the movement from cost reconciliation (lesser of costs or charges) to fee-for-service (FFS), and practitioner-level rates for outpatient treatment services. Now more than ever, it is essential that providers take action(s) to ensure they have a strong and viable organization, and that enough appropriate treatment services are delivered to generate sufficient revenue to cover operational costs.
