

## SOCO - Spay Neuter

- Prevent pet pregnancy by spaying or neutering.
  - There is a pet overpopulation problem. Don't make it worse.
  - Lots of unwanted animals are being euthanized at the animal shelters every day.
  - It's never too late to start saving lives!
- Sterilizing your pet can save you money and reduce liability.
  - It will decrease pet license fees, veterinary bills, pet food costs, and house damage from chewing or potty accidents.
  - It can also prevent diseases, such as cancer.
  - Sterilized pets are less likely to bite people also. Keep your family safe!
- Spaying or neutering can protect the community and family.
  - Sterilized animals are less like to fight or bites.
  - Pets that are spayed or neutered are less likely to wander or be hit by a car.
  - Stray animals may carry fleas, ticks, internal parasites and other infections that can spread diseases to pets and people.
